

Water Mover Activity

You have 5 minutes to complete this activity. Your goal is to fill the jar with water. Each person will use 1 item. As a group, decide which items your team will use to move the water. Once you have decided, the items will be delivered to you by your coach. Next you must decide in what order you will go. One at a time, each team member will take his/her object, collect water from the bucket and then dump it in the jar. Once the student has returned to his/her office, the next student can go. Continue until every student has gone once. Repeat until the jar is full.
